[How you can use RePEc](#) | [RePEc information for participants](#) | [Major participants and activity](#)

RePEc (Research Papers in Economics) is a collaborative effort of hundreds of volunteers in [67 countries](#) to enhance the dissemination of research in economics. The heart of the project is a decentralized database of working papers, journal articles and software components. All RePEc material is freely available.

You may add your own materials to RePEc through a department or institutional archive -- all institutions are welcome to join and [contribute their materials](#) by establishing and maintaining their own RePEc archive. If your institution does not yet participate in RePEc, you may submit your own papers to [MPRA](#) (the Munich Personal RePEc Archive), and they will automatically be included in RePEc. RePEc does not support personal archives (only institutional archives).

RePEc collaborates with the American Economic Association's [EconLit](#) database to
